The College of Business offers a master of business administration (MBA) degree with several concentrations and degree delivery options. Students with undergraduate degrees in business and those from nonbusiness disciplines are equally encouraged to apply. The MBA is accredited by AACSB International and is a highly respected vehicle for enriching undergraduate study in science and engineering, liberal arts, and the social and behavioral sciences as well as for adding depth to the traditional undergraduate business disciplines.

The MBA program consists of 34 semester credit hours. A concentration is not required, but may be selected. The following three-course concentrations are available: accounting, finance, health care management, human resource management, information systems, global business, project management, and sales and new business development. Students not selecting a concentration will select three business electives (9 credit hours) based on their interests and career goals. An Executive MBA is also available for individuals with substantive business experience. All courses in the Executive program are prescribed for a total of 34 credit hours. The MAcc program consists of 30 semester credit hours.
